

Pre-Surgical Instructions

- ⇒ Withhold food after 9:00 p.m. the night before surgery
- ⇒ Your pet may have water
- ⇒ If your pet is currently on medications please bring those with you and we will determine if they should be given the morning of the surgery.
- ⇒ Your pet should arrive at the clinic between 7:30a.m. and 8:00a.m. the morning of surgery. Please allow yourself enough time to go over paper work and speak with the doctor prior to admittance.
- ⇒ We will do our best to call owners after the surgical procedure to provide a status report on their pet(s). Sometimes we do get a little busy. Therefore, we ask if you have not heard from us before 2:00p.m., please give us a call so we may update you on your pet.
- ⇒ Most pets are ready to go home between 4:00p.m. and 6:00p.m.. We can give a better time frame when we call and let you know how the procedure went. Cats that are scheduled for Front Declaws do need to stay over night. These cats are ready to go home the day after the surgery any time after 10:00a.m. unless otherwise instructed.
- ⇒ If you have any further questions regarding the procedure your pet is having, please feel free to give us a call.
